

IT STUDENT PART TIME WORK EXPERIENCE At European HQ / in Glasgow

Fantastic opportunity to work as part of a Software Development Team

COMPANY

SIMUL8 Corporation is a dynamic company offering analytical software and solutions. In addition to selling our own award-winning simulation software, we carry out a diverse range of consulting projects for clients, and design bespoke analytical and decision support systems. Our customers are located world-wide and include major corporations.

ROLE DESCRIPTION

We have a great opportunity for a student to work in an IT Development environment at our European Headquarters in Glasgow, and gain exposure to real Development projects.

Projects will be supported by on-the job training via our experienced team, and provide excellent work experience for IT students wishing to pursue this profession, and indeed a long term career within SIMUL8 Corporation.

Where workload permits, there may be times you are able to work on your own studies during your shift, and still be paid!!!

Note that you will also be required to undertake some general administration and customer service duties (such as answering phones) as required.

Ideal candidate:

- 3rd / 4th year student
- General Programming skills.
- Perl, cgi, php, html and mysql programming skills beneficial.
- Excellent communication skills.
- Strong organisational skills.

Academic Qualifications:

Good higher results.

Preferably on target for a 2.1 degree, but all applications considered.

Application details:

Please send your CV and covering letter, with reference 'part time IT' in the subject title to recruitment@SIMUL8.com
