

**Webinar Series:** Complete Guide to SIMUL8 Success

# Webinar 1:

## Getting Started With Simulation

## Max Guild

- Bsc. Applied Mathematics
- Finance and Banking
- Business Consultant
- Lean Six Sigma

# Agenda

## Session 1: Getting Started with Simulation

- Benefits of Simulation
- SIMUL8 Basics
- Distributions
- Routing

### Session 2:

Adding Complexity to your Simulation

### Session 3:

Controlling your Simulation from Spreadsheets

### Session 4:

Creating Custom Reports

# Simulation Benefits

## Variability

Same number of  
customers everyday?

## Interconnectedness

Delayed aircraft  
blocking a runway.

## Complexity

Multiple pathways,  
different behaviours.

# Simulation Benefits Vs Real Life

## **Cost**

Expensive to experiment with new machinery

## **Time**

Analysis over long/short time period

## **Control of Experimental Conditions**

Change patterns / variables

Repeatability

**Real system does not exist**

# Why SIMUL8?

Visualization > Understanding > Engagement > Communication

# Discrete event simulation

- Time in simulation progresses based on events rather than fixed intervals.
- Clock “jumps” between intervals
- Fastest DES tool on the market

# Support Resources

- F1 Key
- Help menu (File → Help)
- Online User Forum
- Simulation Assistant
- support@SIMUL8.com

# Getting Started

## Building our first simulation

1. Clock Properties
2. Basic Structure

# Distributions & Variability

# Uniform Distribution

# Normal Distribution

- 95% range (lower): mean – 2\* standard deviation
- 95% range (upper): mean + 2\* standard deviation

# Triangular Distribution

Do you have any  
**Questions?**

Tune into our  
NEXT WEBINAR

9.27.16

**Session 2:**

Adding Complexity to your  
Simulation
